

EXCEPTIONALLY EFFICIENT HAIR REMOVAL TECHNIQUES

The world-exclusive *Apilus® Platinum Pure™* offers new hair removal techniques using the 27 MHz radio frequency, all designed to deliver outstanding results: *PicoFlash™*, *MultiPlex™*, *PicoBlend™*, *OmniBlend™*, and *MultiBlend™*.

PicoFlash™

With its exceptional speed, the *PicoFlash™* technique produces a very localized coagulation at the base of the hair follicle avoiding heat dispersion in the surrounding tissues. Thus, it directly targets cells of any type of hair growth, and provides a level of comfort that will amaze your clients.

MultiPlex™

The *MultiPlex™* technique is the ideal solution for curly, distorted hairs. With its combination of low intensity radio frequency and ultrarapid *PicoFlash™* pulse, it helps you to reach the base of the follicle regardless of its shape.

Synchro +™ Option

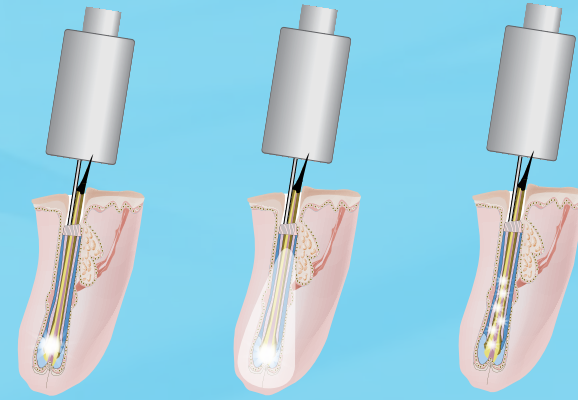

(Patent Pending Technology)

The *Synchro™* radio frequency is very effective for tough and deeply-rooted hairs. Its simultaneous application of a hundred or so 27 MHz picopulses of less than .002 of a second each, eliminate all germ cells located between the bulb and the bulge of the follicle. This unique technology offers impressive results!

Blend Modes

Blend modes, namely *PicoBlend™*, *OmniBlend™* and *MultiBlend™*, are strongly recommended for deeply rooted, stubborn or distorted hairs in the anagen phase. While *PicoBlend™* combines a galvanic current with a precise number of 27 MHz pulses, *OmniBlend™* and *MultiBlend™* combine the galvanic current with a continuous 27 MHz current. The *MultiBlend™* technique also adds a split-second 27 MHz *PicoFlash™* pulse at the end of the Blend sequence. This intensifies the destructive effect of lye inside the hair follicle, from the bulge to the bulb.

PLATINUMTM 27 MHz *PURE*

THE REVOLUTION... IN BRIEF

- Ultrarapid 27 MHz radio frequency.
- 5 highly effective hair removal techniques (radio frequency: *PicoFlash™*, *MultiPlex™*) (Blend: *PicoBlend™*, *OmniBlend™*, *MultiBlend™*).
- User Guide describing all 550 programs (for non-insulated probes)
- Function to convert programs for use with insulated probes
- Ability to record 50 user-defined programs
- "Cataphoresis" mode for post-epilatory care and "Anaphoresis" for deep-cleansing skin treatments
- Connection for *VitaPhase™* devices (optional)
- User-friendly graphic screen with icons
- Displays Units of Lye "U.L." and HF energy Level "e.L."
- Means of operation without footswitch with automatic detection
- Skin moisture sensor
- Computer link
- 2 probe-holder connectors
- Accessory test
- "Processor sentinel" protection circuit
- Current stability monitor
- International power supply with automatic voltage detection
- Meets international medical standards

Available Options:

- Synchro + Option™
- *VitaPhase IM™*, ionization & massage
- *VitaPhase LT™*, light therapy
- *VitaPhase SM™*, electrostimulation, light & massage
- *VitaPhase IR™*, infrared
- Internet Cable

Apilus®, the gentle way to permanent hair removal

27 MHz

The Power of Comfort
Made Simple!

APILUS®
[COMPUTERIZED PERMANENT EPIILATION]
[EPIILATION DEFINITIVE INFORMATISEE]

PLATINUMTM 27 MHz *PURE*

ULTRARAPID FREQUENCY

The world-exclusive design of the *Apilus® Platinum Pure™* uses an ultrarapid 27 MHz radio frequency to permanently and rapidly eliminate all hair types of any color. The *Apilus® Platinum Pure™* works twice as fast as any other epilator by optimizing energy concentration in the hair follicle. The cells responsible for hair growth are more rapidly coagulated, resulting in incomparable effectiveness and comfort.

UNRIVALLED COMFORT

Your clients will not hesitate to ask for more treatments because the *Apilus® Platinum Pure™* offers unprecedented comfort in permanent hair removal. Using state-of-the-art technology, the 27 MHz radio frequency is so swift and concentrated that treatments are much more comfortable as compared to conventional thermolysis and electrolysis. The age of ultra comfortable electrolysis is finally here!

The *Apilus® Platinum Pure™* offers the comfort and effectiveness of the ultrarapid 27 MHz radio frequency in a pure version...

EASY TO USE

The *Apilus® Platimun Pure™* is adaptable to all situations. It includes 550 programs covering each body area and every type of hair. In just seconds, the programs guide electrologists through the configuration of treatment parameters for each of the selected modes. The *Apilus® Platinum Pure™* also offers an automatic function to convert these programs for use with insulated probes. Regardless of the body area and hair type you treat, or the probe you use, the *Apilus® Platimun Pure™* programs will provide you with optimal performance at all times.

DISTINCTIVE POST-EPIATORY CARE

The *Apilus® Platinum Pure™* is equipped with a universal connection for use with all *VitaPhase™* devices. Optionally, *VitaPhase™ IM, LT, SM* and *IR* devices will allow you to offer supplemental ionomassage, light therapy and stimulomassage treatments. Used after hair removal treatments, the *VitaPhase™* devices reduce redness, encourage cellular renewal and provide an antibacterial effect while soothing the skin. Moreover, combined with the vibromassage function, these devices promote an even greater penetration of the active ingredients, thereby enhancing treatment effectiveness.

100% PERMANENT RESULTS MORE RAPIDLY

The effectiveness of the *Apilus® Platinum Pure™* device has been confirmed in comparative scientific studies performed in cooperation with Dr. Charles Doillon, research scientist and professor at the Université Laval Hospital Center in Québec City, Canada.

With the energy concentration of the *Apilus® Platinum Pure™*, it is possible to obtain results much more rapidly than with any other epilator currently on the market. Due to the ultrarapid 27 MHz radio frequency applied precisely inside the follicle, the *Apilus® Platinum Pure™* can permanently eliminate all hair cells. The number of treatments to obtain complete and permanent results is 25% less than usual. Moreover, the *Apilus® Platinum Pure™* can effectively treat any hair or skin color, an achievement that laser or intense pulse light (IPL) devices can't reproduce.

EASY UPDATE BY INTERNET

The *Apilus® Platinum Pure™* can be easily updated by Internet. This very convenient option eliminates any loss of revenue resulting from the necessity of sending your equipment away to be updated. You simply download new programs, applications or options and your system is updated and ready to use!
